«FACING THE GIANT : 3 DECADES OF DISSENT» SHEPARD FAIREY'S SOLO SHOW

PRESS RELEASE / MAY 22ND, 2019

For his second solo exhibition at the Galerie Itinerrance, artist Shepard Fairey x OBEY has chosen to prepare a retrospective exhibition about his 30-year career.

This exhibition represents a dialogue between the 19-year-old punk beginnings of Shepard Fairey and his current life as a 49-year-old artist, activist, punk, father, and husband who's journeyed through trials both metaphorically and literally. Shepard Fairey has always been an artist who speaks his mind through his art, and his latest exhibition is a reflection that highlights both the continuity and the evolution of his art and his concepts over the last 30 years. The title Facing the Giant references the giant of Fairey's prolifically disseminated early stickers of Andre the Giant, but more enduringly, the giant issues and forces he confronts through his art.

Facing the Giant: 3 Decades of Dissent demonstrates that it is possible to marry art and social commentary in ways that are playful, agitational, humorous, seductive, graphically potent, and sometimes even beautiful.

The opening will take place in the presence of the artist and will offer many surprises to the visitors!

Looking forward to seeing you on June 22th, from 6pm to 9pm for the opening of «Facing the Giant: 3 decades of dissent».
