«IMPERMANENT NATURE» CRYPTIK'S SOLO SHOW

PRESS RELEASE / SEPTEMBER 11TH, 2019

Galerie Itinerrance is proud to present « Impermanent Nature», the first solo exhibition by American artist Cryptik in Paris, France !

"Impermanent Nature" is an ambitious exhibition Cryptik has been working on for more than a year. This exhibition has been developed around a simple truth : "All that exists is impermanent; nothing lasts forever". "Impermanent Nature" is an exploration of our own true nature and the nature of reality itself.

Through a new series of artwork and a surprising installation, Cryptik tells us this story related to nature through the lens of anicca (impermanence), which allows us to see ourselves as part of the cycle of life and death (samsara). It is a search for wisdom and beauty in a transient world with the understanding that, through anicca, all things are possible. From the changing of the seasons to our beating hearts, and to every breath we take, anicca is what allows life to happen - impermanence is life.

For this exhibition, Cryptik invites us to deepen our insight into impermanence, we can discover a world beyond notions of life and death; we can discover a world where there is no-birth and no-death, only continuous becoming.

The opening is going to take place in presence of the artist.

We are looking forward to welcoming you on Thursday September 19th 2019, from 6pm to 9pm.

OPENING IN PRESENCE OF THE ARTIST
TURSDAY SEPTEMBER 19TH 2019 AT 6PM TO 9PM
